

Feedback from an active study with Hull Royal Infirmary, NHS Trust

Chris Garner
Operations Director at
NHS University Teaching
Hospitals Hull, together
with Evergen Air
Commercial Director
Luke Beer.

“The results are very exciting as the air purifiers significantly increase airflow & show marked reductions in pathogen and virus size molecules in critical areas.”

Chris Garner
Director of Operations
Hull University Teaching Hospitals

EvergenAir:
An approved supplier to
the NHS

Independent air quality monitoring company, Earthsense concluded that when the Evergen Air purifiers were on in the majors and minors department there was a 55% average reduction in the amount of particles above 0.1 micron which is where many viruses exist, including COVID-19.

This trial demonstrates how Evergen Air not only removes pollutants but meets regulated requirements for air quality.
